; USN Hydrographic Chart 3138, 2d ed, Sep 54, corrected through 19 Feb 66 (U); NPIC Proj. 11486AD/8

Formerly known as Kompang Som, Sihanoukville is undergoing substantial enlargement of its port facilities, which will provide Cambodia with its first significant seaport.

Facilities include 1 large L-head pier, 1 smaller pier, 3 quays, 1 breakwater, 2 large transit sheds, open storage areas, and an area in the process of being filled, which when complete, will provide room for a considerable expansion of storage facilities and vessel berthing.

Dimensions have been derived by the NPIC Technical Intelligence Division and are considered approximate.
